PROFESSIONAL SUMMARY

Full-stack engineer & repeat founder with 10 + years building and scaling products in fast-moving startup environments. I turn early-stage ideas into production software—designing the frontend, wiring up the backend, and shipping to users on tight timelines. Core stack: **TypeScript, Angular, React, Node.js/NestJS, PostgreSQL, Redis, Azure**. I've led small, cross-functional teams, managed client relationships, and owned the full product lifecycle for fintech, ed-tech, and SaaS platforms.

WORK EXPERIENCE

Full Stack Freelance Engineer   **Sep 2022 - Present**
Remote

Helped businesses like AdaaptAI, PromptoDeskAI, Testlify, DesignCandy and Lukfo to launch MVP products end to end, While also worked for BuilderAI, Persistent Systems, and Calix via contract or consulting engagements. Also working on a side project HubNugget, a community based hiring platform. I used tech stacks such as Angular, React, Express, Loopback, NestJS, Azure, AWS, and postgres.

Senior Software Engineer   **April 2021 - Aug 2022**
Enkash | Pune, India

Joined Enkash as a Frontend lead, and launched products such as olympus which was billing management for SMEs, worked initially to build POC for payment gateway integration product, and worked on Spend Management Features. I was part of Enkash journey towards Series B funding round.

Founder   **July 2017 - April 2021**
FivoTech | Chennai, India

I started my Entrepreneurship journey in 2018, built an ERP application for Schools and sold it to a couple of Education Institutes, Built an agency for web and mobile development with a team size of 20 members, onboarded clients globally and delivered projects. Also got extensive experience with SEO as a Service and onboard clients like Toothlens and TurfTown in the team. Also took small jobs to bring funds to the team

initially. Built complex systems such as Microservice architecture, NestJs framework (Node), Docker, and Azure apart from sales and marketing activities.

Programmer Analyst   Jun 2016 - Jun 2017
Cognizant | Chennai, India

I was part of the Investment Banking Project, where I was focused on building reusable components in Angular 2.x & Typescript that were used by 100s of team members, and also helped build Portfolio Management for Investors. My role here was Frontend in Angular, writing test cases, and was part of the agile development process.

Senior Software Engineer   Jun 2015 - April 2016
PixelMagnus | Chennai, India

A 10 member agency, joined as a Software Engineer, shipped more than 10+ projects in a year, built web apps using Angular 1.x and PHP, also built a couple of hybrid mobile apps using Ionic and Native App using Native Android using Java. Also contributed on projects using java in IOT and AR technologies.

Software Engineer   Oct 2013 - May 2015
Surprise Solutions | Chennai, India

I joined as a Native Android developer, completed training in a week and got involved in a project for MTC bus tracking and Ecommerce apps. Company demand for web development made me learn PHP and build websites and backend APIs.
